Professional Experience

Omnicom Global Solutions

Associate Manager - Frontend Team Lead

Pune, India
04/2026 - Current

- Lead, mentor, and build a high-performing frontend team, guiding technical delivery and career progression.
- Own architectural decisions, conduct technical feasibility assessments, and define roadmaps for complex marketing analytics suites.
- Partner with project owners and stakeholders to translate business requirements into clean technical specifications.

Omnicom Global Solutions

Engineering Lead

Pune, India
12/2022 - 03/2026

- Architected reusable UI component libraries using Lit and Vite, achieving 95%+ code reusability across modules.
- Pioneered adoption of next-generation frontend tooling, mono-repo structures, and micro-frontend workflows.

Rakuten Symphony

Technical Lead / Module Lead

Indore, India
02/2015 - 12/2022

- Mentored senior engineers, established code quality standards, and ensured on-time feature delivery.
- Built full-featured web layers using Angular, optimizing performance and RESTful API integrations.

Skills

- JavaScript and TypeScript
- Angular 14+ and Web Components(Lit)
- React
- Micro frontend architecture
- Module federation and single-spa
- HTML5 and CSS3
- Tailwind CSS and Bootstrap
- Vite, Rollup and Webpack
- NPM and Angular CLI
- Mono-repo management with NX
- Storybook and RxJS
- Compodoc documentation
- Git and Bitbucket
- Jira project management
- Code reviews assessment
- Cross-functional collaboration
- Conflict resolution strategies
- AI-Assisted Development(GitHub Copilot, Claude Code)

Projects

- **GeoLift Planner:** Advanced geo-based lift experiments platform executing advertising impact analysis using synthetic control methodology. Lit, Web Components, Vite, TypeScript, Architected and engineered core UI, simulation engines, and real-time reporting dashboards.
- **View Builder:** Low-code/no-code enterprise platform enabling dynamic view generation via JSON configurations. Reduced dev time by 70%. Angular, Micro Frontend, NX, Webpack, Module Lead; spearheaded runtime engine and validation layer.
- **SiteFORGE:** Enterprise process automation platform with integrated modules for inventory, logistics, and dashboards. JavaScript, AngularJS, Highcharts, Google Maps, Frontend Developer; optimized cross-device layouts and UI performance.

Education

Gyan Ganga Institute of Technologies & Sciences | RGPV, MP

Bachelor of Engineering in Information Technology

2010-2014

Patents And Achievements

- Patent (Issued): Method and apparatus for rendering dynamic user interfaces
 - Application No.: PCT/US2022/19221
 - Publication No.: [US12210855B2](#)
 - Publication Date: 2025-01-28
- Innovation: Designed UI configuration system for dynamic view execution without custom code deployment.

Accomplishments

- The OG-Star of the Quarter - Technology(10/04/2025)
- The OG-Star of the Quarter - Technology(30/09/2025)

Languages

- English, Fluent
